Industrial maintenance

Offer

study of clothing collection/ production of garments

We, at Centex, are creators and producers of fashion clothing collections for the major retailers and hypermarket chains in Europe

Thanks to our professional design Team based in Milan and to our strong organization in the country of production, we can assure Italian Fashion @ normal prices.

We are focusing our business in supporting a simple and rational approach with our clients starting from a structured analysis of the previous collection sales results, to the next collection creation, down to production, logistics and delivery.

We call this approach 'turn-key collection' development: you concentrate in your business, we help you delivering a shared concept based on our best skills and knowledge.
