Description

IDRO GROUP Company Profile Idro Group is a consortium of Italian companies highly specialized in environmental science engineering. The consortium companies have more than 30 years of experience and proprietary know how in primary water treatment, drinking water treatment, waste water and water reuse treatment, energy production from biomass sources, and energy recovery from plant and other organic waste. Water treatment: Idro Group's subsidiary company EMWG Srl produces standard and customized mobile and containerized drinking water treatment plants using water from any source including sea water, brackish water, and fresh water. The company also makes equipment for industrial water treatment and waste-water treatment. Not only an equipment manufacturer, EMWG is also a provider of water solutions and training programs for virtually any water problem. The above standard machineries are reliable and suitable for emergency response, oil and gas work camps, field hospitals, small villages, resorts and hotels, military camps, as well as small and medium-sized residential communities. Subsidiary company Idro Engineering is available for turn-key projects on request. Waste to Energy: Idro Group develops turn-key projects in the field of Biogas to Energy. Idro takes plants and biomass from agricultural and agro industrial applications and organic waste fractions, including human waste and sewage. Then using Anaerobic Digestion Plants, clean energy, clean water, and natural fertilizers are created.
